

## "How can I help my child with Glue Ear?"

The Hear Glue Ear app - designed by paediatricians, audiologists and speech and language therapists to help families manage their child's glue ear at home.

- Provides accurate up-to-date information about glue ear.
- Has free games, songs and audiobooks to help children work on certain developmental skills (such as speech, language, auditory processing and listening skills) that might be affected by glue ear.
- Has a hearing game to provide an approximation of a child's hearing while they are at home, which may help the family manage their child's glue ear as it improves, worsens or fluctuates (*this is not as accurate as a professional hearing test: All medical appointments should be attended*).

Search 'Hear Glue Ear' in your app store.
